

I believe LPFM will negatively effect the Saint Cloud area. Airl radio offers a another chance for me to connect with other people at my church. We often talk about the music we heard on Airl. Our church website even has a link to the Airl website. If there were another station in Saint Cloud that played Christian rock I would listen to them, but there simply is not a station as good as theirs. If Airl were forced off the air by an LPFM broadcaster it would leave a void in my life. A typical example of how Airl serves the public interest is this:

I had just received word that my dad had a heart attack. While calling to find people to cover for me at work, so I could travel to visit my dad, I received a call from Airl. They just wanted to confirm my address and asked if I had anything for them to pray about. I told them about my father and their concern truely lifted my spirits. Please don't take Airl away from me.
